

I am a 39 year old mother of two. I have suffered from chronic illness for years which has greatly impaired my ability to function at the appropriate level to care well for the needs of my family. For years I have suffered from debilitating migraines, joint pain, severe chronic fatigue, and of lately frequent chest pains, tightness in the chest and shortness of breath. Also I have some chronic viral issues. The last few years of my life have been like having the flu over and over and over...

Because I heard of the success others have had with chelation products, I decided to try them. I chose to try Cardio Care first, thinking that it would not alter any of my symptoms, but perhaps it would clear the pathway of my cardiovascular system so that when I used Viral-Gonn, it would work more efficiently.

To my surprise, the most debilitating of my symptoms vanished! The first thing I noticed was that I could breathe easily. I don't think I had realized just how bad my breathing had become over time, but I now enjoy immensely the simple act of taking a deep breath. The sharp needle pain in my knees is gone.

(Knee replacements are a common occurrence in my family.) My chest pains have eased. The tightness is gone. Even my shoulders move around more freely. And an unexpected blessing which was worth the cost of Cardio Care alone - I have not had one migraine since! I have even blasted loud hard music in my car to test whether or not a headache would occur as it usual does. Nothing! I am functioning like a normal human every day now. Even my memory has greatly improved. Recently, I ran into an old friend whose name I could previously not recall, which caused us both embarrassment and made us both feel bad. Now she is amazed at the details I am remembering.

Cardio Care has improved my quality of life in so many ways. I can be the mom I have wanted to be, but couldn't. I can not wait to try Viral-Gonn next!
