

Hi All:

We've all heard, "Life Begins at 50". Well whoever coined that phrase didn't suffer from debilitating muscle/joint pain.

Shortly after turning 50, simple movements like getting out of a chair, climbing a few stairs became daunting tasks for me...not to mention sleeping at night. Pain and fatigue consumed my life.

My family doctor and a Rheumatologist diagnosed me with "Arthritis" and prescribed prescription medication. When the pain didn't improve they kept increasing the dosage and told me to "just deal with it".

Feeling totally abandoned by the medical profession, I decided to look at alternative remedies. A friend told me how Dr. Randy Pinch, Doctor of Chinese medicine had helped his pain. Four days after my first visit with Dr. Pinch, I began to notice a slight improvement in my muscle/joint pain. Perhaps there was a light at the end of the dark tunnel.

Over a period of time, we added several other "all natural" products working on building up my compromised immune system and improving circulation. Years of daily stress, toxins in the air we breathe, the food we consume, along with a family history of Arthritis all contributed to my muscle/joint pain.

Listed below are some of the products I've taken and still take:

Cardio Chelation

An oral form of Chelation, (which cleaned the plaque, metals and toxins from my blood stream), was very effective in alleviating my muscle/joint pain to the point where I no longer needed to take the pharmaceutical prescription medication. I experienced no side effects. Sure, I still suffer from Arthritis pain but it is very manageable without even taking any over the counter drugs.

Flex All

Contains Enzymes from black cherries which helped boost my immune system, invigorated my digestion, improved my circulation, and my Arthritis pain. It also helped renew tissue while restoring lost collagen and cartilage flexibility.

Viral Gonn

Is a product I've taken, (in capsule form), throughout this past winter in lieu of getting the flu shot. I'm happy to say I wasn't sick all winter....not even a cold thanks to this product. My daughter, a college student under a lot of stress this winter, also took Viral Gonn and found not only did she stay "cold free"she noticed an improvement in the "trauma cataract" she has in her one eye. The Viral Gonn seems to be thinning the thick film.

Thanks to Dr. Pinch's products, I have my life back.
