

Testimonial for Cardio Chelation

Cardio Chelation is truly a life saving product! When my husband Don was told by his doctor, 3 yrs. ago, that he'd had a stroke and that his carotid artery was blocked, we were devastated. He was having a lot of dizziness that, despite the doctor's medication, did not subside. Don quit the medication and started taking the Cardio Chelation product along with lots of Omega 3's. It wasn't long before the dizziness eased off and he started to come back to life, literally! Don has continued with the chelation and when I asked him today if the product has helped him, his reply was, "I wouldn't be climbing a tree and cutting it down, if it didn't." Don is 82 years young and climbing trees isn't the normal practice of someone of that age. We strongly recommend Cardio Chelation to everyone who wants to get back or keep their ability to move freely, think with a clear mind and have a healthy colour to their skin.

Yours in good health,
Sue & Don J.
