

Virus

Cam has been fighting something bad and I believe that Viral gonn has saved him...he had some kind of cold/flu thing...he woke up one morning and the lymph node on the one side of his neck was swollen to the size of a grapefruit...he started really pumping Viral gonn (like 10 in the morning and 10 at night) the swelling gradually went away and now he is back to 10 a day and still coughing but with major improvement in the way he feels.

Thank you Dr. Randy and thank you for Viral Gonn.
Jane
